

**“Be informed”, la formazione ai cittadini americani attraverso brochure:
essere preparati alle emergenze**

Esempio 1: minaccia biologica

**BE INFORMED
BIOLOGICAL THREAT**

1. A biological attack is the release of germs or other biological substances. Many agents must be inhaled, enter through a cut in the skin or be eaten to make you sick. Some biological agents can cause contagious diseases, others do not.

2. A biological attack may or may not be immediately obvious. While it is possible that you will see signs of a biological attack it is perhaps more likely that local health care workers will report a pattern of unusual illness.

3. You will probably learn of the danger through an emergency radio or TV broadcast.

4. If you become aware of an unusual or suspicious release of an unknown substance nearby, it doesn't hurt to protect yourself.

5. Get away from the substance as quickly as possible.

6. Cover your mouth and nose with layers of fabric that can filter the air but still allow breathing.

Esempio 2: il perfetto *kit* per l'emergenza.

Ready  **Preparing Makes Sense. Get Ready Now.**

1. Get a Kit of emergency supplies.

Be prepared to improvise and use what you have on hand to make it on your own for **at least three days**, maybe longer. While there are many things that might make you more comfortable, think first about fresh water, food and clean air.

Recommended Supplies to Include in a Basic Kit:

- ✓ **Water** one gallon per person per day, for drinking and sanitation
- ✓ **Non-perishable Food** at least a three-day supply
- ✓ Battery-powered or hand crank **radio** and a **NOAA Weather Radio** with tone alert and **extra batteries** for both
- ✓ **Flashlight** and **extra batteries**
- ✓ **First Aid kit**
- ✓ **Whistle** to signal for help
- ✓ **Filter mask** or cotton t-shirt, to help filter the air
- ✓ **Moist towelettes, garbage bags** and **plastic ties** for personal sanitation
- ✓ **Wrench** or **pliers** to turn off utilities
- ✓ **Manual can opener** if kit contains canned food
- ✓ **Plastic sheeting** and **duct tape** to shelter-in-place
- ✓ **Important Family Documents**
- ✓ **Items for unique family needs**, such as daily prescription medications, infant formula or diapers

Consider two kits. In one, put everything you will need to stay where you are and make it on your own. The other should be a lightweight, smaller version you can take with you if you have to get away.

2. Make a Plan for what you will do in an emergency.

Plan in advance what you will do in an emergency. Be prepared to assess the situation. Use common sense and whatever you have on hand to take care of yourself and your loved ones.

Develop a Family Emergency Plan. Your family may not be together when disaster strikes, so plan how you will contact one another and review what you will do in different situations. **Consider a plan where each family member calls, or e-mails, the same friend or relative in the event of an emergency.** It may be easier to make a long-distance phone call than to call across town, so an **out-of-town contact** may be in a better position to communicate among separated family members. Be sure each person knows the phone number and has coins or a prepaid phone card to call the emergency contact. You may have trouble getting through, or the phone system may be down altogether, but be patient. Depending on your circumstances and the nature of the attack, the first important decision is whether you stay put or get away. You should understand and plan for both possibilities. Use common sense and the information you are learning here to determine if there is immediate danger. **Watch television and listen to the radio for official instructions as they become available.**

Preparing Your Pets for Emergencies
Makes Sense. Get Ready Now.

1. Get a Kit of pet emergency supplies.

Just as you do with your family's emergency supply kit, think first about the basics for survival, particularly food and water.

- ✓ **Food:** Keep at least three days of food in an airtight, waterproof container.
- ✓ **Water:** Store at least three days of water specifically for your pets, in addition to water you need for yourself and your family.
- ✓ **Medicines and medical records:** Keep an extra supply of medicines your pet takes on a regular basis in a waterproof container.
- ✓ **First aid kit:** Talk to your veterinarian about what is most appropriate for your pet's emergency medical needs. Most kits should include cotton bandage rolls, bandage tape and scissors; antibiotic ointment; flea and tick prevention; latex gloves, isopropyl alcohol and saline solution. Include a pet first aid reference book.
- ✓ **Collar with ID tag, harness or leash:** Your pet should wear a collar with its rabies tag and identification at all times. Include a backup leash, collar and ID tag in your pet's emergency supply kit.
- ✓ **Important documents:** Place copies of your pet's registration information, adoption papers, vaccination documents and medical records in a clean plastic bag or waterproof container and also add them to your kit.
- ✓ **Crate or other pet carrier:** If you need to evacuate in an emergency situation take your pets and animals with you, provided that it is practical to do so.
- ✓ **Sanitation:** Include pet litter and litter box if appropriate, newspapers, paper towels, plastic trash bags and household chlorine bleach to provide for your pet's sanitation needs. You can use bleach as a disinfectant (dilute nine parts water to one part bleach), or in an emergency you can also use it to purify water. Use 8 drops of regular household liquid bleach per gallon of water, stir well and let it stand for 30 minutes before use. Do not use scented or color safe bleaches or those with added cleaners.
- ✓ **A picture of you and your pet together:** If you become separated from your pet during an emergency, a picture of you and your pet together will help you document ownership and allow others to assist you in identifying your pet. Include detailed information about species, breed, age, sex, color and distinguishing characteristics.
- ✓ **Familiar items:** Put favorite toys, treats or bedding in your kit. Familiar items can help reduce stress for your pet.

Consider two kits. In one, put everything your pets will need to stay where you are and make it on your own. The other should be a lightweight, smaller version you can take with you if you and your pets have to get away.

2. Make a Plan for what you will do in an emergency.

Plan in advance what you will do in an emergency. Be prepared to assess the situation. Use common sense and whatever you have on hand to take care of yourself and ensure your pet's safety during an emergency.

Preparing Makes Sense
for Older Americans. Get Ready Now.

1. Get a Kit of emergency supplies.

Be prepared to improvise and use what you have on hand to make it on your own for at least three days, maybe longer. While there are many things that might make you more comfortable, think first about fresh water, food and clean air.

Recommended Supplies to Include in a Basic Kit:

- ✓ **Water:** one gallon per person per day, for drinking and sanitation
- ✓ **Non-perishable food:** at least a three-day supply
- ✓ **Flashlight and extra batteries**
- ✓ **First Aid kit**
- ✓ **Whistle** to signal for help
- ✓ **Filter mask** or cotton t-shirt, to help filter the air
- ✓ **Moist towelettes, garbage bags and plastic ties** for personal sanitation
- ✓ **Wrench or pliers** to turn off utilities
- ✓ **Battery-powered or hand crank radio** and a NOAA Weather Radio with tone alert and extra batteries
- ✓ **Manual can opener** if kit contains canned food
- ✓ **Plastic sheeting and duct tape**, to shelter -in-place
- ✓ **Important family documents** Items for unique family needs, such as daily prescription medication or pet food

Include Medications and Medical Supplies: If you take medicine or use a medical treatment on a daily basis, be sure you have what you need on hand to make it on your own for at least a week and keep a copy of your prescriptions as well as dosage or treatment information. If it is not possible to have a week-long supply of medicines and supplies, keep as much as possible on hand and talk to your pharmacist or doctor about what else you should do to prepare. If you undergo routine treatments administered by a clinic or hospital or if you receive regular services such as home health care, treatment or transportation, talk to your service provider about their emergency plans. Work with them to identify back-up service providers within your area and other areas you might evacuate to.

Include Emergency Documents: Include copies of important documents in your emergency supply kits such as family records, medical records, wills, deeds, social security number, charge and bank accounts information and tax records. It is best to keep these documents in a waterproof container. If there is any information related to operating equipment or life-saving devices that you rely on, include those in your emergency kit as well. If you have a communication disability, make sure your emergency information list notes the best way to communicate with you. Also be sure you have cash or travelers checks in your kits in case you need to purchase supplies.

Additional Items: If you use eyeglass, hearing aids and hearing aid batteries, wheelchair batteries or oxygen, be sure you always have extras in your kit. Also have copies of your medical insurance, Medicare and Medicaid cards readily available. If you have a service animal, be sure to include food, water, collar with ID tag, medical records and other emergency pet supplies.

Consider two kits: In one, put everything you will need to stay where you are and make it on your own. The other should be a lightweight, smaller version you can take with you if you have to get away.

2. Make a Plan for what you will do in an emergency.

The reality of a disaster situation is that you will likely not have access to everyday conveniences. To plan in advance, think through the details of your everyday life.

Develop a Family Emergency Plan: Your family may not be together when disaster strikes, so plan how you will contact one another and review what you will do in different situations. **Consider a plan where each family member calls, or e-mails, the same friend or relative in the event of an emergency.** It may be easier to make a long-distance phone call than to call across town, so an **out-of-town contact** may be in a better position to communicate among separated family members. Depending on your circumstances and the nature of the attack, the first important decision is whether you stay put or get away. You should understand and plan for both possibilities. **Watch television and listen to the radio for official instructions as they become available.**
