NEL LAVORO E D

MARISTAER GROTTAGLIE - TARANTO

1. The first group of respondents (Group 1) consisted of 10 individuals who were members of the local community and had been involved in the project for a period of 12 months. They were selected through a purposive sampling method to ensure that they had a range of experiences and perspectives on the project. The second group of respondents (Group 2) consisted of 10 individuals who were members of the local community and had been involved in the project for a period of 6 months. They were selected through a purposive sampling method to ensure that they had a range of experiences and perspectives on the project. The third group of respondents (Group 3) consisted of 10 individuals who were members of the local community and had been involved in the project for a period of 3 months. They were selected through a purposive sampling method to ensure that they had a range of experiences and perspectives on the project. The fourth group of respondents (Group 4) consisted of 10 individuals who were members of the local community and had been involved in the project for a period of 1 month. They were selected through a purposive sampling method to ensure that they had a range of experiences and perspectives on the project. The fifth group of respondents (Group 5) consisted of 10 individuals who were members of the local community and had been involved in the project for a period of 1 week. They were selected through a purposive sampling method to ensure that they had a range of experiences and perspectives on the project.
