

DISCIPLINARE TECNICO

DISCIPLINARE TECNICO

1. SCOPO

Scopo del presente Disciplinare Tecnico, che è parte integrante al Contratto come Allegato, è quello di specificare le modalità e le condizioni a cui la Ditta deve attenersi per la fornitura di beni/servizi descritti nel provvedimento amministrativo in argomento e di seguito riassunta:

- Fornitura di materiali “*General Use Consumable*” programmati (chimici e NON chimici) (Annesso 1) con consegna a cadenza periodica.

2. DOCUMENTAZIONE E NORMATIVA APPLICABILE

La documentazione e le specifiche di seguito indicate sono considerate parti integranti del presente Disciplinare, anche se non allegate:

1. SGD-G-036 “Definizione dell’appropriato requisito contrattuale di sistema gestione Qualità e clausola contrattuale basica Standard”;
2. SGD-G-039 “Processo di Valutazione di parte seconda dei sistemi di gestione qualità aziendali”;
3. AQAP 2070 “NATO Guide for the Delegation of Government Quality Assurance”;
4. AQAP 2105 “NATO Requirements for Quality Plans”;
5. AQAP 2110 “NATO Quality Assurance Requirements for Design, Development and Production”;
6. AQAP 2310 “NATO Quality Assurance Requirements for Aviation, Space and Defence Suppliers”;
7. AQAP 2130 “NATO Quality Assurance Requirements for Inspection and Test”;
8. ISO 9000:2005 “Quality Management Systems – Fundamentals and Vocabulary”;
9. UNI ISO 31000:2018, “Gestione del rischio - Linee guida”, edizione 2018;
10. CL-2DV-028 “Gestione dei Piani di assicurazione Qualità”;
11. AER(EP).P-15 “Linea guida per la gestione e l’impiego dei Prodotti Chimici Peculiari Aeronautici (PCPA) e suo Supplemento “A””;
12. COMLOG 213 CLA-NL-2140-0001-00B00 BASE 18-04-2005 “GESTIONE DEI PRODOTTI DI CONSUMO PECULIARE AERONAUTICI”;
13. CL-SUP-015 CLA-NL-4130-0003-00B00 BASE 19-12-2018 “NORME SUL SERVIZIO P.O.L. AVIO - CL-SUP-015”;
14. D. Lgs. 81/2008 e Regolamento (CE) n. 1907/2006 (REACH);
15. SGD-G-035 “*Guida al Sistema di Codificazione NATO*” ed. 2017 emanata da SEGREDIFESA;
16. CLA-NL-0430-0001-01B00 (CL-STM-014) REVI 18 MARZO 2019 “La Codificazione Del Materiale Dell’aeronautica Militare”.

3. FORNITURA DI MATERIALI “GENERAL USE CONSUMABLE” (GUC) A SUPPORTO DELLE ATTIVITÀ MANUTENTIVE

La fornitura di materiale GUC include materiali “Non Chimici” e “Chimici” come specificato nella lista riportata in Annesso 1 secondo le modalità di fornitura riportate nei paragrafi seguenti. Costituisce parte integrante del presente Disciplinare la legenda, riportata in Annesso 2, che spiega le voci delle liste riportate nell’ Annesso 1. La Ditta si impegna a fornire in qualità e quantità i beni indicati in annesso rispettandone le caratteristiche tecniche ed i requisiti di utilizzo consapevoli di essere responsabili della mancata fornitura per motivi rilevabili in sede di verifica di conformità. Per il materiale POL le tempistiche di accettazione del materiale sono subordinate all’assolvimento degli obblighi di analisi previsti dalla direttiva a riferimento 13, le spedizioni dei campioni di materiale POL ai laboratori previsti sono a carico della Ditta.

3.1. SEDE DI ESECUZIONE DELL’ATTIVITÀ

Il servizio di fornitura è erogato nei seguenti siti militari:

- Aeronautica Militare Cameri – 1° RMV;

Su ogni sito verranno identificati e comunicati alla ditta i referenti per il servizio di fornitura.

3.2. SERVIZIO DI FORNITURA DI MATERIALI PROGRAMMATI “GENERAL USE CONSUMABLE”, CHIMICI E NON CHIMICI, CON FORNITURA PERIODICA

I materiali riportati nella lista in Annesso 1 saranno forniti con una cadenza annuale nei quantitativi dei materiali ivi stabiliti, per un totale di 2 lotti di consegna. Le tempistiche delle consegne sono così individuate:

Lotto 1: $t_0 + 30$ gg.

Lotto 2: $t_0 + 12$ mesi + 30 gg.

Si considera T_0 il primo giorno di efficacia del contratto).

Il servizio di fornitura di tali materiali sarà soggetto a monitoraggio della *performance* utilizzando i seguenti parametri *item per item*, ciascuno identificato dal proprio livello di servizio:

- Tempo intercorso tra la data di effettiva consegna dei materiali (*Actual Delivery Date – ADD*) e la data programmata di consegna (*Programmed Delivery Date – FDD*). Livello di servizio atteso: non superiore a 7 giorni calendariali.

Le modalità attuative avverranno tra le parti secondo la procedura dedicata posta in Annesso 3.

La consegna del materiale avverrà presso la sede del 1°RMV di Cameri ed include le seguenti prestazioni accessorie e complementari:

- la manovalanza connessa con il trasporto per l’immagazzinamento dei materiali consegnati.
- Fornitura di attrezzature per la movimentazione dei materiali quali:
 - Carrelli elevatori per carichi di piccola e media portata
 - Fork-lift.

Saranno a carico della Ditta tutte le attività accessorie e necessarie al trasporto (richiesta autorizzazioni, predisposizioni HAZMAT *et similia*).

3.3. CONSEGNA DEI MATERIALI

Il materiale GUC, sarà custodito presso un'area dedicata all'interno del sedime di Cameri messa a disposizione dall'AD alla ditta per l'intero arco temporale di esecuzione del presente contratto in attesa della verifica di conformità e consegna all'AD. Il tempo di franchigia massimo per lo scarico del materiale è di 4 ore nella stessa giornata.

La Ditta provvederà a comunicare al Direttore per l'Esecuzione, tramite lettera di Approntamento alla Verifica di Conformità, la disponibilità del materiale per l'effettuazione della Verifica di Conformità e la successiva consegna che permetterà la presa in carico del materiale da parte dell'AD. La Ditta farà richiesta di presentazione a verifica di conformità del materiale solo quando la documentazione prevista dal presente paragrafo sia disponibile e quando abbiano avuto esito positivo le procedure per la codifica del materiale. La data di proposta dalla Ditta per la presentazione alla Verifica di Conformità diventa il riferimento contrattuale per il calcolo delle tempistiche relative all'adempimento della corrispondente prestazione. E' facoltà della Ditta richiedere di presentare alla Verifica di Conformità anche lotti frazionati di materiale. Tale richiesta deve essere valutata dal Direttore per l'Esecuzione ed autorizzata dal Responsabile per l'Esecuzione; in ogni caso le penalità contrattualmente previste saranno comunque applicate al lotto omogeneo. Inoltre, eventuali ammanchi di materiali sulle consegne programmate e/o richieste dovranno essere comunicati al Direttore per l'Esecuzione o suoi delegati almeno 14 (10) giorni calendariali (lavorativi) in anticipo rispetto alla data di consegna prevista; in tali casi la Ditta dovrà fornire indicazioni sulle modalità e tempistiche di consegna dei materiali mancanti. L'adempimento di tale previsione non esclude comunque l'inadempienza contrattuale della Ditta.

All'arrivo del materiale presso il sedime militare, il responsabile per la ricezione del materiale, indicato alla Ditta dal Direttore per l'Esecuzione o suo delegato, provvederà alla ricezione del materiale e della seguente documentazione che sarà necessaria per la verifica di conformità da parte dell'Organo di Verifica:

- Certificato di Conformità del produttore;
- *Test Report* del produttore (ove applicabile) relativi alle analisi di laboratorio effettuate sui lotti consegnati firmato dal Responsabile del laboratorio della Ditta produttrice, completo di relazione tecnica attestante la metodologia e la strumentazione impiegata e tutti i test relativi al processo di produzione;
- Certificato di Conformità del distributore (ove applicabile);
- Scheda di Sicurezza (SDS) e Scenari d'Esposizione (SE ove applicabili) in formato europeo e in lingua italiana (previste dal Regolamento CEE/UE n. 1907 del 18/12/2006 REACH e successivo 453/2010), Scheda tecnica e *Material Safety Data Sheet* (MSDS) (in caso di prima fornitura ed eventuali aggiornamenti) ove applicabile;
- Certificato di Conformità (CoC secondo il modello riportato nella norma AQAP2070);
- i dati di codificazione NATO del materiale, composti dai dati identificativi, da quelli di gestione e dai relativi codici a barre. Per gli articoli di origine estera dovrà essere, altresì,

presentato il Form AC/135 N.7, contenente informazioni tecnico amministrative aggiuntive. Il formato e le informazioni per la compilazione sono contenute nella SGD-G-035 “Guida al Sistema di Codificazione NATO” ed. 2017 emanata da SEGREDIFESA e dalla CL-STM-014 “La Codificazione Del Materiale dell’Aeronautica Militare”;

- per il solo materiale POL: il referto delle analisi condotte presso Laboratorio AM in accordo alla norma a riferimento 13.

Le prestazioni previste dal presente contratto dovranno essere presentate alla Verifica di Conformità secondo le seguenti modalità:

- per le prestazioni relative ai servizi di cui al para 3.2 il materiale sarà presentato alla Verifica di Conformità. Effettuata dall’Organo di Verifica preposto la Verifica di Conformità e comunicato l’esito al Direttore per l’Esecuzione, il Responsabile per l’Esecuzione notificherà alla Ditta, a mezzo lettera o raccomandata, l’accettazione/rifiuto del lotto consegnato; entro 15gg dalla data di ricezione dell’accettazione la Ditta predisporrà per il Direttore dell’Esecuzione la documentazione necessaria alla consegna del lotto presentato a collaudo:
 - documento di scarico contabile riportante *items* consegnati;
 - prezzi e contratto di riferimento;

L’Organo di Verifica potrà eseguire ulteriori verifiche secondo quanto previsto dalle norme a riferimento 12 e 13.

Qualora a valle dell’attività di verifica si dovesse riscontrare presso le sedi di utilizzo dei materiali la presenza di materiale non integro o inutilizzabile per qualsiasi motivo la Ditta dovrà provvedere alla sostituzione. Il materiale fornito in sostituzione dovrà essere presentato alla Verifica di Conformità entro 15 giorni dalla comunicazione del Direttore dell’Esecuzione.

3.4. SHELF LIFE DEI MATERIALI

In ottemperanza a quanto prescritto della Norma AER(EP)P-15A Edizione 26/02/2013, tutti i materiali deteriorabili oggetto di fornitura devono assicurare, all’atto della consegna, una *Shelf Life* (SL) residua pari a:

- 80% per i prodotti caratterizzati da una SL presunta superiore a 6 mesi;
- 70% per i prodotti caratterizzati da una SL presunta inferiore od uguale a 6 mesi.

La *shelf life* di ogni *item* è calcolata in base alla normativa Italiana e/o Europea. Qualora non disponibile si farà riferimento a normative Internazionali o in vigore negli Stati Uniti d’America.

Nel caso di contrasto tra le norme citate verrà considerata, per ogni singolo *item*, la *shelf life* più restrittiva.

Eventuali deroghe per comprovata impossibilità del rispetto di tali previsioni per cause non dipendenti dalla Ditta saranno valutate dal Responsabile per l’Esecuzione in base alla valutazione del Direttore per l’Esecuzione.

3.5. MONITORAGGIO DELLE PRESTAZIONI DEL SERVIZIO DI FORNITURA

La Ditta fornirà un *report* semestrale al Direttore dell'Esecuzione ed al Responsabile per l'Esecuzione dell'andamento della *performance* del servizio di fornitura ed il relativo confronto con ciascun livello di servizio atteso.

3.6. ASSICURAZIONE QUALITÀ

La Ditta dovrà presentare il Piano di Assicurazione Qualità relativo al presente servizio in base alla direttiva CL-2DV-028.

3.7. FOCAL POINTS DITTA

La Ditta nomina un *focal point* tecnico ed un responsabile per la consegna delle forniture presso il sedime di Cameri.

LEGENDA U.I.
AM -- Ampoule
A small glass or plastic tube sealed by fusion after filling.
AT -- Assortment
A collection of a variety of items that fall into a category or class packaged as a small unit constituting a single item of supply. Used only when the term assortment is a part of the item name.
AY -- Assembly
A collection of parts assembled to form a complete unit, constituting a single item of supply, e.g., hose assembly. Used only when the term assembly is a part of the item name.
BA -- Ball
A spherical-shaped mass of material such as twine or thread.
BD -- Bundle
A quantity of the same item tied together without compression.
BE -- Bale
A shaped unit of compressible materials bound with cord or metal ties and usually wrapped, e.g., paper and cloth rags.
BF -- Board Foot
A unit of measure for lumber equal to the volume of a board 12" x 12" x 1".
BG -- Bag
A flexible container of various sizes and shapes which is fabricated from such materials as paper, plastic or textiles. This term includes sack and pouch.
BK -- Book
A book-like package, such as labels or tickets, fastened together along one edge, usually between protective covers.
BL -- Barrel
A cylindrical container, metal or wood, with sides that bulge outward and flat ends or heads of equal diameter. This term includes keg.
BO -- Bolt
A flat fold of fabric having a stiff paperboard core.
BR -- Bar
A solid piece or block of various materials, with its length greater than its other dimensions, e.g., solder. This term is not applicable to items such as soap, beeswax, or buffing compounds.
BT -- Bottle
A glass, plastic, or earthenware container of various sizes, shapes, and finishes such as jugs but excluding jars, ampoules, vials, and carboys, with a closure for retention of contents.
BX -- Box
A rigid, three dimensional container of various sizes and material. This term includes case, carton, tray, and crate.
CA -- Cartridge
Usually a tubular receptacle containing loose or pliable material and designed to permit ready insertion into an apparatus for dispensing the material. This term is usually associated with adhesives and sealing compounds.
CB -- Carboy
A heavy duty, bottle-type container used for transportation and storage of liquids. A Carboy is usually designed to be encased in a rigid protective outer container for shipment.
CD -- Cubic Yard
A unit of cubic measure.
CE -- Cone
A cone-shaped mass of material wound on itself such as twine or thread, wound on a conical core.
CF -- Cubic Foot
A unit of cubic measure.
CK -- Cake
A block of compacted or congealed matter. This term is applied to such items as soap, and buffing compound.
CL -- Coil
An arrangement of material such as wire, rope, and tubing wound in a circular shape.
CN -- Can
A rigid receptacle made of fibre, metal, plastic, or a combination thereof. Cans may be cylindrical or any number of irregular shapes. Use of this term is restricted to items which cannot be issued in less than container quantity. This term includes pail and canister. This term is not used when the packaged quantity equates to a unit of measure, i.e., pint, quart, gallon, ounce, or pound.

LEGENDA U.I.
CO -- Container
A general term for use only when an item is permitted to be packaged for issue in optional containers, e.g., bottle or tube for a single national stock number.
CY -- Cylinder
A rigid, cylindrical, metal container designed as a portable container for storage and transportation of compressed gasses, generally equipped with protected valve closure and pressure relief safety device.
CZ -- Cubic Meter
A unit of cubic measure expressed in the metric system of measurement. This term is limited in application to locally assigned stock numbers used in the local procurement of items such as ready-mix concrete and asphalt in oversea areas where the metric system prevails.
DR -- Drum
A Cylindrical container designed as an exterior pack for storing and shipping bulk materials, e.g., fuels, chemicals, powders, etc. Drums may be made of metal, rubber, polyethylene or plywood, or fibre with wooden, metal, or fibre ends.
DZ -- Dozen
Twelve (12) of an item of supply.
EA -- Each
A numeric quantity of one item of supply. This term is not meant to be used if a more specific term applies, such as kit, set, assortment, assembly, group, sheet, plate, strip, or length.
FT -- Foot
Unit of linear measurement, sometimes expressed as linear foot.
FV -- Five
Five (5) of an item.
FY -- Fifty
Fifty (50) of an item.
GL -- Gallon
Unit of liquid measurement.
GP -- Group
A collection of related items issued as a single item of supply, e.g., test set group. This abbreviation is used only when the term group is a part of the item name.
GR -- Gross
One hundred forty-four (144) of an item.
HD -- Hundred
One hundred (100) of an item.
HK -- Hank
A loop of yarn or roping, containing definite yardage, e.g., cotton, 840 yards; worsted, 560 yards. See skein for comparison.
IN -- Inch
Unit of linear measurement, equivalent to 1/12 of a foot and sometimes expressed as linear inch.
JR -- Jar
A rigid container having a wide mouth and often no neck, typically made of earthenware or glass. This term excludes bottle.
KT -- Kit
A collection of related items issued as a single item of supply, such as the tools, instruments, repair parts, instruction sheets and often supplies typically carried in a box or bag. This term also includes selected collections of equipment components, tools, and/or materials for the repair, overhaul, or modification of equipment. This abbreviation is used only when the term kit is a part of the item name.
LB -- Pound
A unit of avoirdupois weight measure equivalent to 16 ounces.
LG -- Length
This term applies to items issued in fixed or specific linear measurement, without deviation. LG no longer applies to random lengths which will be expressed in definitive units of linear measure such as foot or yard. This abbreviation excludes strip.
LI -- Liter
A unit of liquid measure expressed in the metric system of measurement.
MC -- Thousand Cubic Feet
A unit of cubic measure expressed in one thousand (1,000) increments.
ME -- Meal
The measure of food generally taken by an individual at one time.

LEGENDA U.I.
MR -- Meter
A unit of linear measure expressed in the metric system of measurement, equivalent to 39.37 inches.
MX -- Thousand
One thousand (1,000) of an item.
OT -- Outfit
A collection of related items issued as a single item of supply, such as the tools, instruments, materials, equipment, and/or instruction manual(s) for the practice of a trade or profession or for the carrying out of a particular project or function. This abbreviation is use only when the term outfit is a part of the item name.
OZ -- Ounce
A unit of liquid or avoirdupois weight.
PD -- Pad
Multiple sheets of paper that are stacked together and fastened at one end by sealing.
PG -- Package
A form of protective wrapping for two or more of the same item of supply. This abbreviation is used only when a unit of measure or container type term is not applicable. PG includes envelope.
PM -- Plate
A flat piece of square or rectangular-shaped metal of uniform thickness, usually 1/4 inch or more. This abbreviation is used only when plate (FSCs 9515 and 9535) is used in an item name to denote shape.
PR -- Pair
Two similar corresponding items, e.g., gloves, shoes, bearings; or items integrally fabricated of two corresponding parts, e.g., trouser, shears, goggles.
PT -- Pint
A unit of liquid or dry measure.
PZ -- Packet
A container used for subsistence items. This term is used only when food packet is part of the item name (FSG 89).
QT -- Quart
A unit of liquid or dry measure.
RA -- Ration
The food allowance of one person for one day. This term is used only when ration (FSC 8970) is a part of the item name.
RL -- Reel
A cylindrical core on which a flexible material, such as wire or cable, is wound. Reels usually have flanged ends.
RM -- Ream
A quantity of paper varying from 480 to 516 sheets, depending upon grade.
RO -- Roll
A cylindrical configuration of flexible material which has been rolled on itself such as textiles, tape, abrasive paper, photosensitive paper and film, and may utilize a core with or without flanges.
SD -- Skid
A pallet-like platform consisting of a load-bearing area fastened to and resting on runner type supports.
SE -- Set
A collection of matched or related items issued as a single item of supply, i.e., tool sets, instrument sets, and matched sets. This abbreviation is used only when the term set is a part of the item name.
SF -- Square Foot
A unit of square measure (area).
SH -- Sheet
A flat piece of rectangular-shaped material of uniform thickness that is very thin in relation to its length and width, such as metal, plastic, paper, and plywood. The use of this term is not limited to any group of items or FSCs, however, it will always be applied when sheet is used in the item name to denote shape, e.g., aluminum alloy sheet, except items in FSC 7210.
SK -- Skein
A loop of yarn 120 yards in length, usually wound on a 54-inch circular core. See hank for comparison.
SL -- Spool
A cylindrical form with an edge or rim at each end and an axial hole for a pin or spindle on which a flexible material such as thread or wire is wound.
SO -- Shot
A unit of linear measurement, usually applied to anchor chain; equivalent to 15 fathoms (90 ft).

LEGENDA U.I.
SP -- Strip
A relatively narrow, flat length of material, uniform in width, such as paper, wood, and metal. This abbreviation is used only when the term strip is a part of the item name.
SX -- Stick
Material in a relatively long and slender, often cylindrical form for ease of application or use, e.g., abrasives.
SY -- Square Yard
A unit of square measure (area).
TD -- Twenty-Four
Twenty-four (24) of an item.
TE -- Ten
Ten (10) of an item.
TF -- Twenty-Five
Twenty-five (25) of an item.
TN -- Ton
The equivalent of 2000 lbs. This term includes short ton and net ton.
TO -- Troy Ounce
A unit of troy weight measure, based on 12-ounce pound, generally applied to weights of precious metals
UI -- Unit of Issue
A code indicating the physical measurement, the count or, when neither is applicable, the container or shape of an item for purposes of requisitioning by, and issue to, the end-user; and is that element of management data to which the unit price is ascribed.
