                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | MINISTERO DELLA DIFESA<br>DIREZIONE GENERALE DEI LAVORI<br>1° Reparto – Ufficio <span style="background-color: yellow;">                    </span> | Rev. 3       |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                     | Pag. 3 di 28 |
|  ## 1 PREMESSA

Il presente Capitolato speciale, di cui all'art. 87 comma 2 del D.lgs. 36/2023 e ss.mm.ii., definisce i contenuti del rapporto contrattuale tra la Stazione Appaltante (SA) e l'appaltatore individuato mediante procedura di affidamento art. 59 del D.lgs. 36/2023 (accordo quadro). L'appalto ha per oggetto l'espletamento delle funzioni del costituendo Ufficio di Direzione Lavori (UDL), comprensivo del Coordinamento alla Sicurezza in Esecuzione (CSE), Collaudatore statico in corso d'opera, Collaudatore tecnico funzionale degli impianti in corso d'opera nonché del Direttore Lavori (DL) e del supporto al Responsabile Unico di Progetto (RUP)/Responsabile di Procedimento per la fase di Esecuzione (RPE) in accordo a quanto chiesto dalla SA, in relazione ai lavori di "██████████".

Il presente documento sarà parte integrante del contratto attuativo che verrà stipulato a valle della procedura di affidamento del servizio. Esso stabilisce norme, prescrizioni ed oneri generali a carico dell'appaltatore, nonché le clausole particolari dirette a regolare il rapporto gestionale e contrattuale tra l'Amministrazione e l'Appaltatore del servizio in oggetto.

L'Appaltatore metterà a disposizione dell'Amministrazione Difesa (AD) le risorse umane e strumentali per rendere funzionale la struttura organizzativa preposta alla direzione e controllo tecnico contabile ed amministrativo dei lavori, da porre alle dipendenze del Direttore dei Lavori.

La gestione del servizio dovrà essere svolta con di metodi e strumenti elettronici specifici, quali quelli di modellazione per l'edilizia e le infrastrutture (DM 560 del 1 dicembre 2017 coordinato con le modifiche apportate dal decreto MiMS n. 312 del 2 agosto 2021).

## 2 NORMATIVA DI RIFERIMENTO

L'esecuzione delle prestazioni previste nel presente Capitolato speciale deve avvenire nel pieno rispetto di tutta la normativa in vigore al momento della stipula del contratto. Si riportano di seguito, a titolo meramente esemplificativo e non esaustivo, alcune delle principali norme di riferimento:

- DPR 308/2001 e ss.mm.ii. di seguito denominato “Testo unico dell’edilizia”;
- DPR 236/2012 di seguito denominato “Regolamento Difesa”;
- D.lgs. 42/2004 e ss.mm.ii. di seguito denominato “Codice beni culturali e paesaggio”;
- D.lgs. 152/2006 e ss.mm.ii. di seguito denominato “Codice ambientale”;
- D.lgs. 81/2008 e ss.mm.ii. di seguito denominato “Testo unico della sicurezza”;
- D.lgs. 66/2010 e ss.mm.ii. di seguito denominato “Codice dell’ordinamento militare”;
- D.lgs. 36/2023 e ss.mm.ii. di seguito denominato “Codice”;
- Linee Guida di attuazione del “Codice dei contratti” dell’ANAC;
- L. 11 settembre 2020, n. 120 - Conversione in legge, con modificazioni, del decreto-legge 16 luglio 2020, n. 76, recante «Misure urgenti per la semplificazione e l’innovazione digitali» (Decreto Semplificazioni);

|                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Rev. 3       |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | 09/01/2025   |
|                                                                                   |  #### 4 DESCRIZIONE SOMMARIA DELLE OPERE OGGETTO DEI LAVORI DA REALIZZARE

L'intervento viene compiutamente descritto nel Progetto Esecutivo dei lavori di "[REDACTED]" che è parte integrante del presente Capitolato Speciale.

L'Appaltatore accetta e si obbliga ad acquisire la completa e dettagliata conoscenza degli elementi tecnici ed amministrativo/contabili del progetto.

Di seguito una sintesi delle opere previste dal progetto:

- [REDACTED]
- [REDACTED]
- [REDACTED]

#### 5 OBBLIGHI DELL'APPALTATORE RELATIVI ALLA GESTIONE INFORMATIVA DEI LAVORI

I contenuti del presente capitolo saranno successivamente dettagliati all'interno dello specifico Capitolato Informativo (CI), strutturato secondo la norma UNI 11337, in coerenza con quanto richiesto nell'allegato I.9 del Codice "Metodi e strumenti di gestione informativa digitale delle costruzioni".

##### 5.1 Gestione Informativa

Nel presente servizio si dovranno adottare metodi e strumenti di gestione informativa digitale delle costruzioni al fine di assicurare una gestione strutturata e integrata delle informazioni relative all'esecuzione, controllo, collaudo e manutenzione delle opere.

L'Appaltatore dovrà garantire la gestione informativa mediante l'utilizzo di metodologie e strumenti digitali conformi al **D.M. 01/12/2017 n. 560** (Decreto BIM) e alle prescrizioni dell'**art. 43** e dell'**Allegato I.9 del Codice**.

Coerentemente con quanto esposto nei paragrafi seguenti, l'Appaltatore dovrà formalizzare la propria offerta di gestione informativa (oGI), in linea ai requisiti minimi espressi nel CI, descrivendo come intende garantire, ed eventualmente approfondire e ampliare, quanto richiesto dalla Stazione Appaltante.

Al fine di rendere esecutivo ed applicativo quanto indicato nell'oGI, sarà compito dell'Affidatario, in sede di verbalizzazione dell'inizio della prestazione, consegnare la prima stesura del Piano di Gestione Informativa (pGI) nel quale saranno sviluppati dettagliatamente i contenuti dell'oGI e che dovrà essere preventivamente coordinato e concordato con la Committenza

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                                                                     | Pag. 9 di 28 |

 |                                                                                                                                                     |              |

## 5.2 Prevalenza contrattuale

La prevalenza contrattuale dei contenuti informativi è definita all'interno del capitolato speciale d'appalto dei lavori.

La produzione, il trasferimento e la condivisione dei contenuti del servizio avvengono attraverso supporti informativi digitali in un ambiente di condivisione dei dati, nonché in formato cartaceo e su supporto digitale, come previsto nel presente capitolato.

## 5.3 Specifica di riferimento dell'evoluzione del processo informativo

L'appaltatore dovrà **verificare che l'esecutore dei lavori utilizzi metodi e strumenti BIM al fine di raggiungere e completare correttamente lo stadio di produzione**, ovvero produca un insieme strutturato di contenuti informativi necessari alla costruzione dell'opera, al controllo di quanto eseguito e alla consegna dell'intervento.

In particolare, sono individuate due differenti fasi:

- **fase di esecuzione**, ovvero l'insieme dei contenuti informativi relativi all'operatività del cantiere: per la redazione del progetto costruttivo, per la definizione dei prodotti e dei materiali da installare e per la tenuta contabile;
- **fase di collaudo e consegna**, ovvero l'insieme dei contenuti informativi relativi alla verifica del risultato della fase di esecuzione e del suo successivo aggiornamento per la redazione dell'as-built.

Fine ultimo dell'appaltatore è garantire che alla consegna dell'intervento, ovvero alla chiusura dello stadio di produzione, il trasferimento del bene e delle relative informazioni dall'esecutore dei lavori al Committente, tutti i contenuti informativi siano coerenti con il Piano di Gestione Informativa e siano utilizzabili dal Committente stesso, dall'utilizzatore e/o dal gestore/manutentore dell'opera per il successivo stadio di esercizio.

## 5.4 Obiettivi informativi e usi dei modelli

Vengono definiti obiettivi e usi dei modelli in funzione delle fasi del processo informativo.

## 5.5 Struttura informativa richiesta all'affidatario per l'intervento specifico

Ai fini della gestione digitalizzata del progetto, è richiesto all'affidatario di predisporre, implementare, mantenere e mettere a disposizione della Committenza, dalla consegna del servizio per tutta la durata del contratto, inclusa la fase di collaudo, la seguente dotazione:

- un ambiente di condivisione dati (ACDat), in analogia al Common Data Environment (CDE), conforme alla norma UNI EN ISO 19650 che costituisca il punto centrale per la raccolta, gestione e distribuzione delle informazioni digitali relative alle attività di propria competenza;
- un archivio di condivisione documenti non digitali (ACDoc), in analogia al Data Room (DR), presso cui verranno conservate tutte le copie di modelli e copie od originali di elaborati su supporto non digitale, cartacee del materiale informativo acquisito e utilizzato dall'affidatario con garanzia di accessibilità da parte dei soggetti autorizzati.

L'ACDat dovrà garantire i seguenti requisiti:

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |                                                                                                                                                     |               |

- **Accesso controllato:** profilazione degli utenti autorizzati (Stazione Appaltante, Direzione Lavori, RUP ed esecutore dei lavori) mediante credenziali e livelli di permesso differenziati;
- **Sicurezza e riservatezza dei dati:** adozione di misure di protezione conformi alla norma UNI CEI EN ISO/IEC 27001 e al Regolamento UE 2016/679 (GDPR);
- **Interoperabilità:** gestione e visualizzazione dei dati in formati standard aperti ovvero IFC (ISO 16739:2013), per garantire la piena compatibilità con i sistemi utilizzati;
- **Audit log:** registrazione automatica di tutte le operazioni eseguite, per garantire la tracciabilità delle modifiche apportate ai modelli e ai documenti;
- **Flussi approvativi:** processi e procedure di revisione, approvazione e validazione della documentazione, favorendo il controllo e la condivisione delle versioni sempre aggiornate della documentazione e dei modelli;
- **Gestione dei metadati** relativi allo stato di avanzamento dei diversi documenti (lavorazione, condivisione, pubblicazione, archiviazione).

L'Appaltatore dovrà provvedere a eventuali adeguamenti tecnologici e sarà responsabile della manutenzione e del corretto funzionamento dell'ACDat per tutta la durata del contratto, inclusa la fase di collaudo.

## 5.6 Modelli Informativi

L'Appaltatore, nella figura del DL con il supporto dell'UDL, è tenuto a controllare ed approvare, sentito il RUP/RPE, i modelli informativi in tutte le loro componenti, aggiornati dall'esecutore dei lavori nella fase esecutiva, ovvero prima della realizzazione delle opere per la definizione del **modello costruttivo** e nella fase di collaudo e consegna, ovvero durante l'esecuzione delle opere per la definizione del **modello as-built**. Resterà a carico dell'esecutore dei lavori il costante aggiornamento dei modelli informativi durante l'intero periodo contrattuale, compreso l'individuazione e la risoluzione delle interferenze e incoerenze informative, la modellazione 4D (tempi), la modellazione 5D (costi) e la modellazione 6D (manutenzione).

L'Appaltatore del presente servizio garantirà il controllo e la gestione integrata dei flussi informativi, come di seguito dettagliato:

### Fase 1 pre-consegna lavori:

L'Appaltatore predisporrà l'ACDat, identificando i livelli di accesso e definendo le modalità di aggiornamento e condivisione dei dati secondo il Piano di Gestione Informativa.

L'appaltatore del presente servizio riceverà il modello costruttivo (esecutivo contrattuale modificato/aggiornato/integrato in relazione alle eventuali migliorie e secondo le esigenze operative dell'esecutore dei lavori), nonché tutti gli elaborati correlati da utilizzare come base per l'attività di competenza.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Rev. 3        |

  |               |

- **CDE Manager o Gestore dell'ACDat:** responsabile dell'amministrazione e dell'organizzazione dell'ACDat.

Queste figure saranno integrate nella struttura organizzativa dell'Ufficio di Direzione Lavori (UDL), in particolare nella **sezione coordinamento e contabilità**, e collaboreranno con il Direttore Lavori, il RUP e le altre figure tecniche.

## 6 MODALITÀ DI ESECUZIONE DELLA PRESTAZIONE

Il presente Capitolato Speciale ha per oggetto l'espletamento delle funzioni del costituendo Ufficio di Direzione Lavori, comprensivo del Coordinamento alla Sicurezza in Esecuzione, Collaudatore statico in corso d'opera, Collaudatore tecnico funzionale degli impianti in corso d'opera, del supporto al RUP / RPE e Direttore dei Lavori secondo quanto chiesto dalla SA, in relazione ai lavori di "[REDACTED]".

L'Appaltatore metterà a disposizione dell'Amministrazione Difesa (AD) le risorse umane come da organigramma in **allegato 1** (**allegare miglioria proposta dall'Appaltatore in sede di gara**) e strumentali (allestimento in situ sede operativa di cantiere) come da proposta migliorativa in **allegato 2** (**allegare miglioria proposta dell'Appaltatore in sede di gara**) per rendere funzionale la fase esecutiva di Direzione Lavori che dovrà svolgere le sottoelencate funzioni:

- espletamento dell'incarico di Direttore Lavori **qualora richiesto**;
- organizzazione e gestione della direzione lavori e controllo tecnico contabile ed amministrativo dei lavori per il tramite di Direttori Operativi e Ispettori di cantiere;
- espletamento dell'incarico di "Coordinatore per la Sicurezza in fase Esecuzione" ai sensi dell'art. 92 del D.lgs. n. 81/2008 e ss.mm.ii.", organizzando una struttura tale da garantire lo svolgimento del servizio in linea ai tempi e modalità previste dal progetto;
- supporto al RUP/RPE nelle questioni tecniche, amministrative, contabili, giuridiche correlate all'esecuzione dei lavori, comprese eventuali problematiche/controversie con l'esecutore dei lavori, **qualora previsto**;
- gestione dell'UDL per tutte le attività di coordinamento del personale, pratiche amministrative, redazione di documenti, presentazioni e quant'altro di competenza della DL;
- approntamento di quanto necessario a rendere funzionale, allestire e gestire la Sede Operativa dell'UDL;
- progettazione e gestione delle eventuali varianti tecniche e contabili in fase di esecuzione lavori (oggetto di eventuale modifica contrattuale art. 120, co. 1, let. a del Codice, cfr. paragrafo 4.9);
- espletamento dell'incarico di Collaudatore Statico in corso d'opera;
- espletamento dell'incarico di Collaudatore tecnico funzionale di tutti gli impianti da realizzare.

Il servizio in parola è da considerarsi a corpo, non scindibile nelle funzioni specifiche impiegate per la determinazione del corrispettivo posto a base di gara.

| <b>CAPITOLATO SPECIALE</b>                                                                                                                                |                                                                                            |               |
| Servizio d'ingegneria per le attività di Ufficio Direzione Lavori ed altre figure professionali correlate alla fase esecutiva dei lavori di "[REDACTED]". |                                                                                            |               |

L'appaltatore dovrà designare un proprio **Responsabile del servizio**, indicato in sede di gara, che sarà il referente per il RPE/DEC del presente servizio. Tale figura dovrà coincidere con il Responsabile della Sezione Coordinamento e Contabilità dell'UDL o con il Direttore Lavori qualora richiesto all'Appaltatore. Il Responsabile della sezione Coordinamento ed i suoi collaboratori, assolveranno anche ai compiti delle figure previste all'allegato I.9 del D.Lgs.36/23 per la gestione contrattuale mediante metodi e strumenti di gestione informativa digitale.

Il servizio si intende normalmente svolto presso il cantiere e/o presso la Sede Operativa di cantiere. Questa sarà resa disponibile dalla ditta Esecutrice Lavori solamente con i servizi essenziali (connessioni elettroidrauliche).

L'appaltatore dovrà sempre garantire la presenza:

- in cantiere o presso stabilimenti di produzione o centri di trasformazione al fine di assicurare costantemente la supervisione dei lavori e la qualità dei materiali indipendentemente dall’orario o giorno (anche festivi e fuori normale orario di lavoro);
- presso la sede operativa di cantiere del personale necessario a supportare il DL nello svolgimento delle sue funzioni.

Le attività di Direzione lavori avrà inizio con l'adozione di specifico provvedimento di costituzione dell'Ufficio Direzione Lavori da parte del Responsabile del Procedimento in fase di esecuzione.

Le attività di coordinamento iniziale dell'UDL, antecedenti alla consegna della sede operativa, potranno essere svolte in presenza in cantiere e/o a distanza secondo le indicazioni di dettaglio di volta in volta indicate dal RUP o dal RPE.

Dopo il completamento dei lavori, il servizio potrà essere svolto sino al collaudo secondo le prescrizioni e le modalità stabilite dal RPE o dal RUP.

La conclusione del servizio avverrà con l’emissione dell’atto di collaudo provvisorio dei lavori fatto salvo il caso in cui eventuale contenzioso si protragga oltre tale termine. In tal caso il contratto resterà nel suo periodo d’efficacia fino all’emissione di apposito Certificato di verifica di conformità del servizio, ai sensi dell’art. 37 dell’allegato II.14.

### 6.1 DIRETTORE DEI LAVORI (QUALORA RICHIESTO)

Il professionista incaricato come Direttore dei Lavori svolge l'incarico nel pieno rispetto di leggi, decreti, regolamenti, circolari, norme, regole, ecc. in vigore e alla dipendenza della S.A. committente, in particolare tutto quanto riportato nell'art. 1 dell'allegato II.14.

I compiti e le funzioni di Direttore dei Lavori devono essere dunque attribuiti ad un solo soggetto il quale dovrà dichiarare, prima dell'avvio dei lavori, di non versare in alcuna delle situazioni di incompatibilità previste dal Codice e dai dispositivi regolamentari.

Il Direttore dei Lavori dovrà garantire almeno una visita settimanale in cantiere, per tutta la durata dei Lavori.

Il DL si relaziona con il RPE almeno settimanalmente per tutta la durata della prestazione, circa

|                                                                                                                                                           |                                                                                            |               |

| <b>CAPITOLATO SPECIALE</b>                                                                                                                                |                                                                                            |               |
| Servizio d'ingegneria per le attività di Ufficio Direzione Lavori ed altre figure professionali correlate alla fase esecutiva dei lavori di "[REDACTED]". |                                                                                            |               |

Le verifiche a carico del coordinatore dovranno essere effettuate in via preliminare alle operazioni di consegna dei lavori e contestualmente allo sviluppo dei lavori in argomento.

L'Appaltatore dovrà fornire tutta la documentazione necessaria e prodotta, firmata dallo stesso ed eventualmente controfirmata da soggetti interessati.

L'Appaltatore, a conclusione del servizio, dovrà consegnare una copia di tutta la documentazione prodotta nel corso delle varie attività previste, firmata.

#### 6.4 SUPPORTO AL RUP (QUALORA RICHIESTO)

L'Appaltatore metterà a disposizione della SA una struttura, come da art. 3 dell'Allegato I.2, del D.lgs. 36/2023, che possa supportare il RUP/RPE in tutte le attività tecniche, amministrative, economiche e giuridiche affidategli direttamente dalla normativa vigente cui all'allegato I.2 art. 6, 7, 8 ed, indirettamente, dall'allegato II.14 del D.lgs. 36/2023.

A titolo esemplificativo, non esaustivo, dovrà essere fornita assistenza al RUP per:

- consulenza e assistenza nella gestione delle richieste, quesiti, dimostranze, lagnanze avanzati dall'Esecutore dei lavori;
- la predisposizione delle istruttorie e comunicazioni previste con l'ANAC ed in generale con gli enti competenti in fase esecuzione lavori;
- la cura delle istruttorie e predisponendo gli atti necessari con particolare riguardo alle valutazioni delle riserve e dei contenziosi per quanto attiene aspetti giuridico amministrativi;
- ausilio istruttorio e consultorio, finalizzato alla valutazione del rischio contenzioso, sulle comunicazioni in uscita verso l'esecutore dei Lavori (ordini di servizio, sospensioni lavori, etc.) con particolare riguardo agli aspetti giuridico-amministrativi e contrattuali;
- l'identificazione degli aspetti contrattuali particolarmente critici che possano generare rischio di contenzioso e ritardi nell'esecuzione;
- la gestione delle contestazioni su aspetti amministrativo-giuridici e le riserve, attenendosi alla relativa disciplina prevista dalla stazione appaltante e riportata nel capitolato d'appalto dei lavori;
- l'individuazione e analisi delle cause per gli aspetti giuridico-contrattuali che influiscono negativamente sul buon andamento delle lavorazioni e proponendo le adeguate azioni correttive;
- definire possibili soluzioni alle problematiche tecniche e/o tecnico/amministrative che emergono nella fase di esecuzione;
- eventuale contraddittorio tra esecutore dei lavori e SA o con il collaudatore;
- eventuali incontri con Enti competenti in fase esecuzione lavori;
- la definizione di azioni finalizzate alla migliore riuscita delle opere oggetto di lavorazione;
- le scelte in merito alle eventuali soluzioni di varianti progettuali.

|     mezzo notizie o dati di cui sia venuto a conoscenza per effetto dei rapporti intercorsi con l'Amministrazione.

L'Appaltatore è altresì tenuto ad adottare, nell'ambito della sua organizzazione, le necessarie cautele affinché il divieto di cui sopra sia scrupolosamente osservato e fatto osservare dai propri collaboratori.

L'Appaltatore pertanto dovrà trattare tutte le informazioni e i documenti acquisiti con riservatezza e non farne uso se non per l'esecuzione del servizio.

L'Appaltatore, alla chiusura del servizio, dovrà restituire i documenti, forniti dall'Amministrazione Difesa nel corso della prestazione, nello stesso stato in cui gli stessi gli furono messi a disposizione e dovrà impegnarsi a non detenere, dopo tale riconsegna, alcuna copia di tale documentazione.

In caso di inottemperanza degli obblighi espressi, il Soggetto Professionale sarà tenuto a rispondere di qualunque illegittima divulgazione del materiale innanzi indicato.

## SCHEMA DI MASSIMA STRUTTURA UFFICIO DIREZIONE LAVORI

\* Responsabile di Fase: Tecnico Amministrazione Difesa NON OGGETTO DI APPALTO

\*\*Ove previsto (vds. Tabella MASTER). Se non oggetto di appalto, a cura dell'Amministrazione Difesa
